

San Diego & Wichita

Update from Jacob Burow August 2010

JUSTICE
FOR ALL

Greetings in the name of our Lord Jesus! This is just a quick update on what I've been up to recently.

As an organization we have had the pleasure of working with the Alliance Defense Fund. They help with our legal needs when we deal with tough university officials. I recently had the opportunity to travel to San Diego to help out on a project with them. I can't share the details yet, but I'm really excited about it and will certainly let you know more in the future.

After the event there in San Diego, Josh Pedrick and I drove to Wichita, KS where we helped clean up our new office building. Thank God for His provision! This building is right next to our current office and will help tremendously while we continue to grow as an organization.

I'll be staying home for part of our fall schedule to fundraise. I still need close to two-thirds of my support. If you have pledged already, will you send in your first donation?

One really big thing I need is for you all to help me connect to other people. I would love to speak to your pastor, home group, friends, etc. This is vital so that I can finish my fundraising and move to Wichita.

Here is a brief overview of what my job will be.

We currently have our large exhibit which we typically set up for two days on a campus. We usually only go to a particular campus every two years.

I still need your support. Will you make a pledge today?

We have experimented with a two-hour outreach, where students get a small sign they can put indoors and do outreach for short durations. This will give the student groups something to do in our absence, and help them to grow in between the times we bring the large exhibit.

My job will be to help oversee the design, creation, and distribution of those small signs, as well as help train students to use them lovingly and effectively.

This project fits my range of skills well, and I'm excited to tackle it. Please pray with me that I can finish my fundraising soon and get going on this task.

Many Blessings,

Jacob Burow
